Ar. Daily. Ex. Sun.	Ar. Daily. Ex. Sun.				Lv. Daily, Ex. Sun.	Lv. Daily, Ex. Sun.

SPECIAL RULES.

When behind time freight trains may run twenty-two miles per hour.

When crossing bridges at Stanislaus, Tuolumne, Merced, San Joaquin, Kings and Kern rivers, speed of passenger trains must not exceed fifteen miles per hour, and freight trains eight miles per hour.

The southern limit of Fresno yard is extended to the switch at the junction of the Fresno Division, one mile south of Fresno; and the northern limit is extended to Standard Oil Co. spur, one mile north of Fresno.

The northern limit of Poso yard is extended to the switch at the junction of the Fresno Division, one mile north of Poso.

All trains carrying passengers will make full stops and let them off at their destination.

All trains will enter Merced, Berenda, Fresno, Goshen Junction, Armona, Tulare, Collis and Poso yards with care and under full control, expecting to find the main track occupied.

Freight trains will carry no passengers but employees to or from their work, except Nos. 23 and 24 between Mendota and Bakersfield, and 25, 26, 27 and 28 between Tulare and Lathrop, and except as provided in Rule 242.

Trains coming into junction points will stop and make sure that no train is approaching before going upon the main line.

Standard clocks are located at Lathrop, Merced, Fresno, Goshen, Bakersfield and Mendota.

In pulling out of stations, brakemen must watch wheels closely to see that brakes are fully released, and will immediately signal engineers to stop when wheels are found sliding. Engineers must keep a sharp lookout for such signals, as per Rule 278. Each brakeman will be held responsible for any wheels slid flat under the part of the train in his charge. Conductors in reporting flat wheels will give name of brakeman in charge.

See Rule 84.—All west-bound trains have the absolute right of track over all trains of the same class running in the opposite direction.
